Evgeniy Babkin

Senior Data Analyst

Recruitment & HR Analytics · DWH · BI · Automation

Khimki, Moscow, Russia | mr.salt12@gmail.com | linkedin.com/in/evgeniy-babkin | github.com/mrsalt3000

Senior Data Analyst with **7+ years in people analytics**, focused on **recruitment and HR analytics**: BI, **DWH design**, data modeling, and automation. At Raiffeisen Bank led the **Power BI → DataLens migration**, coordinated **ML-based candidate scoring**, modernized the HR analytics data model on **PySpark and Hadoop**, and designed **row-level security** for HR dashboards. Earlier: central recruitment analytics at **Yandex**, People & Culture BI at **INGKA (IKEA) Russia**.

Experience

Senior HR Data Analyst Nov 2023 – Present
Raiffeisen Bank Russia *Moscow, Russia*

- Lead **recruitment analytics** and core **HR analytics** across BI, data modeling, and automation; led the migration from **Power BI to DataLens** — planning, stakeholder alignment, team mentoring, and rollout of **centralized development standards**.
- Coordinated the development of **ML-based candidate scoring**: planning, delivery management, and analytical data preparation.
- Modernized the HR analytics **data model** using **PySpark**, **Hadoop**, and DWH principles to improve scalability and support end-to-end reporting.
- Designed and implemented **row-level security (RLS)** for HR dashboards across the bank, enabling role-based visibility for sensitive HR data.
- Delivered the **central HR KPI dashboard** for managers and recruitment dashboards for senior leadership; established a new **dashboard operating model** covering structure, access roles, development workflow, and stakeholder feedback.
- Standardized dashboard **data modeling** for cross-functional use cases, defined a methodology for evaluating new **metrics** before implementation, and prioritized initiatives with **RICE**.
- Mentored junior analysts; conducted **50+ technical interviews** and **about 20 technical assessments**.

HR Analyst – Developer Sep 2021 – Oct 2023
Yandex — Central Recruitment Analytics *Moscow, Russia*

- Supported central recruitment analytics through **dashboards**, **datasets**, and **data marts**, including continuous improvement: enhancements, bug fixing, and investigation of **data expectation gaps**.
- Designed and implemented a **sensitive data access model**, enabling secure and scalable use of recruitment analytics across stakeholder groups.
- Automated operational workflows, including task allocation and template-based document preparation; delivered ad hoc data extracts and hiring analysis.
- Ran **workshops** on dashboards and hiring data; consulted recruiters and stakeholders on metric interpretation and analytical logic.
- Collaborated with **C&B analytics** and **HR Tech** on shared dashboards and data quality; participated in **hiring HR analysts** (test assignments, assessment, interviews).

People Analytics & Information Specialist Jul 2019 – Sep 2021
INGKA Russia (IKEA) — Central People Analytics *Khimki, Russia*

- Built **dashboards and interactive reports** that gave HR and business teams visibility into people metrics for operational and management decisions.
- Used **Power BI**, **Python**, **PostgreSQL**, and Excel to prepare data, build reports, and support recurring analytics needs.
- Localized global analytical tools for the Russian business context and contributed to the development and revision of **People KPIs**, supporting Centers of Expertise in BI adoption.

Education

Novosibirsk State Technical University (NSTU) — Master's degree, Microelectronics and Nanoelectronics, 2011–2013
